Premium Grade Filter Media

Certikin have selected the new Zeoclere-30 Premier Grade as their leading brand of filter media. Not only does Zeoclere offer new technology in water chemistry, it offers many advantages over standard filter sand.

It is the only filter media globally that has received NSF 61 – NSF50 – NSF50 ii and British Government DWI approval for use in public pools.

From private pools through to the largest water park, Zeoclere will not only enhance the quality of the water but profits the pool owner and swimmer from the day of installation.

–When second best is not enough install Zeoclere-30.

TURBIDITY TEST

New Zeoclere-30 Premium Grade Filter Media

Tested: Horizontal filter bed depth 400mm (16")

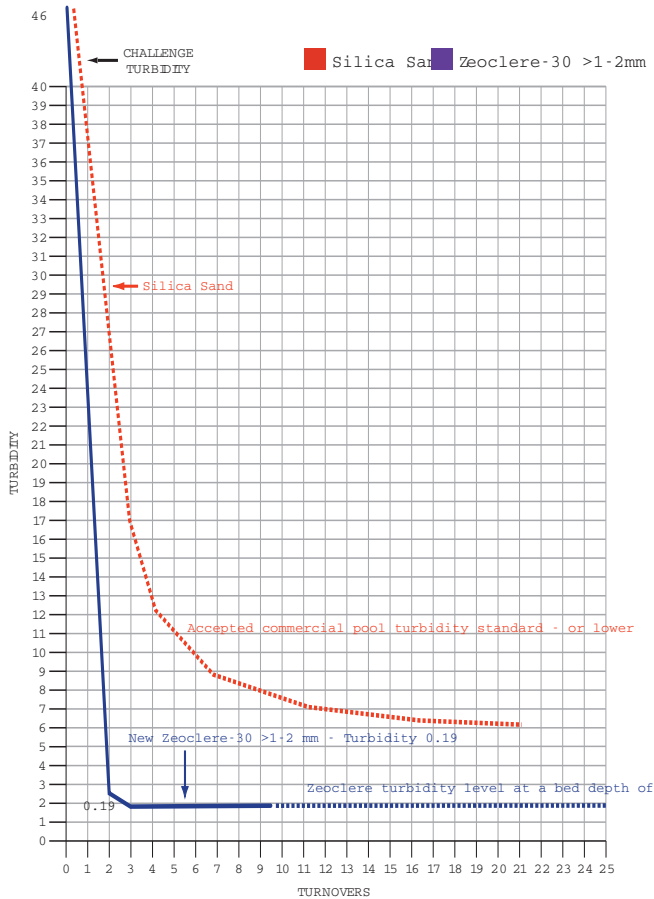

Turbidity: Increased bed depth improves take up.

Certificated: NSF 50 Turbidity – Pass

NSF 50 ii – for Pools and Spas

NSF 61 – Drinking Water

DWI approved for Public Pools.

If your company's aim is always to offer your customers the ultimate in water quality, then we at Certikin recommend the use of new Zeoclere-30 Premium Grade Filter Media.

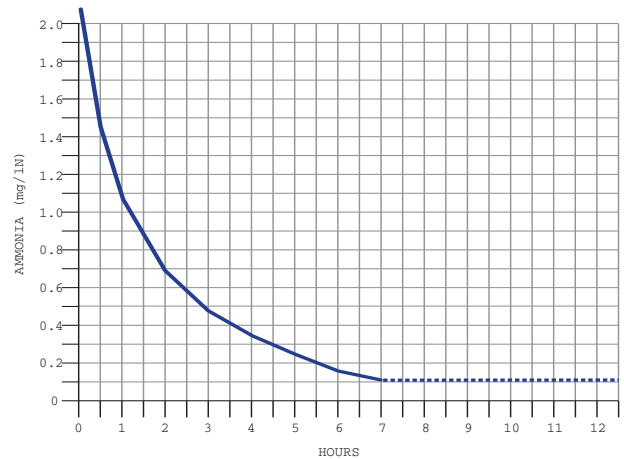

A natural media specially selected and processed from a family of ion exchange minerals, this product is processed, treated and activated to achieve the ultimate in water quality, unsurpassed by any other swimming pool water filtration media. It can reduce turbidity levels to some 60% better than accepted sand standards. It has a very powerful ammonium removal quality, with a new media surface area per grain being some 400% greater than that of sand.

It strips out bacteria from the water plus having an added advantage of removing heavy metals that sometimes come in from city piped water supplies.

So, if you are wishing to give your customer the maximum in quality crystal clear water – which is why a swimming pool is installed!, then the only route to go is Zeoclere-30 – the big mover in accomplishing quality water.

Installation details available on request.

AMMONIA REDUCTION/REMOVAL

CUSTOMER TESTIMONIALS

Farnborough Leisure Centre - UK

"My only regret is that we did not switch both pools over to Zeoclere at the same time."

Department of The Army - USA

"I want to personally thank you for the outstanding product that you have provided for our pool."

Dragons Health Club - UK

"We were recommended to change to Zeoclere by a number of experts – one of my better decisions!"

Welbro Construction - USA

"Performs better than advertised".

Sarasota, YMC - USA

"This stuff is great. In fact probably the biggest breakthrough I have ever seen."

Miami Filters - USA

"Chlorine odour has disappeared, water clarity has improved plus there is longer duration between backwashing."

Barracuda Swimming Club - Nassau

"We recommend Zeoclere to pool owners and operators".

Council Rock High School - USA

"We used to have problems with cloudiness."

... and many more ...
