

[SUMMARY]

Why Alkorplan by Aquaflex?

- 1.50mm thick reinforced membrane, tailored on site.
- Fixed at top of pool wall using bead fixing or PVC coated non corrosive metal profiles.
- Profiles anchored with stainless steel expanding rivets.
- Seams welded with 50mm overlap and laid over geotextile where necessary.
- Life expectancy in excess of 15 years.

The advantages.....

- Cost effective system (see below).
- Performance unaffected by minor movement within the pool structure.
- Covers old surfaces with minimum preparation.
- Fast installation service.
- Can be installed in complex shaped pools including step units.
- Quickly transforms old pools.
- Easily repaired if vandalised.
