Introduction

The SPECK PUMPEN brand has always had a reputation for innovation. With new technologies and distinctive design, intelligent functions and forward-looking concepts, SPECK PUMPEN's products have constantly set standards. The impetus for this spirit of innovation is the ability to recognize customers' requirements. This is complemented by an imaginativeness which always surpasses expectations.

People's requirements have changed significantly in the swimming pool sector in particular. As a result of the world being so hectic and fast-moving, stress has become a major factor in our lives and takes its toll on physical and spiritual well-being.

A swimming pool of one's own is the perfect anti-stress therapy. The days when such an acquisition was pure luxury are gone. The dream of having a pool is now an affordable reality, and more and more people are enjoying relaxing in one of their own.

Our aim is to make your pool even more relaxing and refreshing and at the same time to offer you the opportunity of an excellent fitness programme as well.

This brochure will give you an initial overview of our swimming pool product range and introduce the possibilities for turning your pool into an oasis of relaxation and fitness.

The best for your pool

» Only by swimming against the current is it possible to arrive at the source.«

(Lao Tzu)

That would be unlikely to happen with this model. The superior design, technical characteristics and quality of the power pack of our built-in counter swim units are impressive.

The luxury class

The powerful jet pump of the BADU Jet super-sport guarantees perfect enjoyment in the water. Even competitive sportsmen and women will »work up a sweat«. The adjustable flow rate allows you to adapt the system to your requirements at any time.

Experience a new quality of freedom in your own pool. Create a small holiday paradise right there in your garden and enjoy the possibilities for both fitness and relaxation.

BADU Jet super-sport

The best for your pool

» **T**emptations should be yielded to. Who knows whether they will return!«

(Oscar Wilde)

You should not resist this temptation. Give in to the charm of this built-in counter swim unit and bring beauty and quality to your pool.

The top class

This model is also equipped with a very powerful jet pump. In contrast to the BADU Jet super-sport, the BADU Jet classic lines up with only one jet nozzle. It is nevertheless a true »competitor«. Everything is possible – from powerful massage to a tingling air bubble bath.

Everything a pool needs. Expand the possibilities for keeping fit or diving into a wide sea of relaxation. At any time, whenever you feel like it. No more stressful long journeys to reach the closest beach. Your own pool is now a holiday paradise!

BADU Jet *CLASSIC*

The new freedom for your pool

» **A** person has three ways of acting wisely: firstly by meditation, that is the most noble way; secondly by imitation, that is the easiest way; and thirdly by experience, that is the hardest way.«

(Confucius)

Experience these ways with our BADU Jet smart. Think of the noble design and imagine what it would be like to get into the pool with such beauty early in the morning. It is also very easy to do this again every day. Enjoy the feeling – without any limits. The only hard experience will be having to forgo this pleasure even for a day.

The compact class

This new counter swim unit combines decades of experience in swimming pool technology, innovation and a clear design.

Its compact form makes it suitable for virtually any pool. Very simple installation and low maintenance costs add to the fun factor of this system.

BADU Jet smart

More flexibility for your pool

» **A**ppreciate the little things in life as much as the big things. It is unbelievable how much strength the soul can give to the body.«

(Wilhelm von Humboldt)

The problem with a pool, especially with smaller pools, is the limits which are set for the user. Nothing is nearer than the nearest pool wall. But it doesn't have to be like this.

The power class

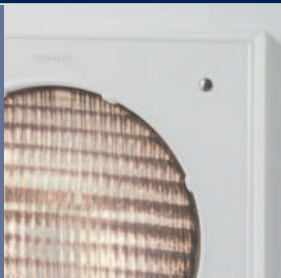

Flexibility is one of the strengths of our overhang counter swim units. If you would like to increase the »Fit for Fun« factor of your pool, these systems are just right for you. Intended for retrofitting, they adapt perfectly to any pool.

Power for your pool. The BADU Jet action leaves no wish unfulfilled. Pure power from two adjustable swivelling jet nozzles challenges even the competitive swimmer to produce maximum performance.

In order that you can keep fit when it's late as well, this power pack also comes with a powerful 300 W underwater spotlight, which also bathes your pool in a wonderful, atmospheric light.

BADU Jet action

The power class

An overhang counter swim unit offering something special for all active sporty types. Our BADU Jet swing. An adjustable swivelling jet nozzle ensures powerful pressure in the pool. A system which will »make you sweat«.

For an atmospheric evening around or in the pool, a version of this model with a 300 W underwater spotlight is also available. Enjoy the sight of your pool bathed in light and the envious looks of your friends and neighbours.

BADU Jet swing

The mid-class

The BADU Jet impulse model is a powerful system for medium-sized pools. With its adjustable swivelling jet nozzle, it meets just about every demand.

Massage hose and pulsator (see accessories) are already included with this model.

The BADU Jet impulse is of course also available with an underwater spotlight. For a restful, and perhaps sensuous, evening in the glow of your brightly lit pool.

BADU Jet impulse

The mid-class

Fit for Fun. With the BADU Jet standard full enjoyment of the water is guaranteed in smaller pools too. Experience the power of this system, combined with its successful design, in your pool as well. Developed especially for retrofitting, this overhang counter swim unit enhances any pool.

A romantic mood is created by the version with built-in underwater spotlight – the BADU Jet standard-spot. In the evening hours, a powerful 50 W spotlight bathes your pool in a soft, tranquil light, which invites you irresistibly to relax.

BADU Jet standard

The entry class

The BADU Jet active is intended especially for very small pools, and in particular above-ground pools. The system for unlimited pleasure in the water.

A small, extremely inexpensive overhang counter swim unit with a swivelling jet nozzle. This system is available only in an AC version. You too can make your pool an oasis of sportiness and relaxation.

BADU Jet *active*

Relaxation for your pool

» **A** healthy body forms a happy pairing with a cheerful soul.«

(August von Kotzebue)

Keeping body and soul in harmony is the true art of life. Nothing is worse than mental and physical exhaustion. What could be better than one's own pool for »recharging the batteries«.

The feelgood class

These two BADU massage stations, for installation in pool bottom and wall, are the perfect complement to our BADU Jet super-sport and BADU Jet classic overhang counter swim units. The powerful massage action of the 1-hole wall jet nozzle and the bottom jet nozzle relaxes tenseness wonderfully. The tingling of the 5-hole bottom jet nozzle stimulates the circulation.

Whether it is the tingling feeling of countless air bubbles surrounding your body or a powerful massage – both relax you and you recover your energy. A feeling of well-being you can enjoy again every day – in your own pool!

BADU Massage stations

More for your pool

» **W**hat suffices is never too little.«
(Seneca)

The standard equipment range is essentially complete, but it is possible to supplement our products with various accessories. Entirely as you prefer, entirely as you require.

Accessories

Three massage attachments and two massage hoses transform our counter swim units into your own personal masseur. Either pinpoint massage or pulsating massage.

Tense neck, tense back. What could be more unpleasant? But you do not have to suffer because, subject to consultation with your doctor, the various massage attachments should make these problems a thing of the past. Fitness, relaxation and therapy – all you could need.

Tips for swimming pool owners

1. *Heat for free:*

Between you and us: diving into cold water may well be very healthy ... but you'd prefer it nicely warmed? Preferably for free? And in an environmentally friendly way as well? Simple: the sun and our BADU swimming pool collectors make this all possible.

2. *Optimum and convenient cleaning:*

You can't avoid cleaning the bottom of the pool. It becomes dirty over time and so you have to clean it thoroughly every now and then. Doing this by hand is very time-consuming; much more convenient are our automatic bottom cleaners.

3. *Automatic filtering:*

Your swimming pool may be intended to be a leisure facility, and maintaining, cleaning and inspecting it may be rather tiresome, but these jobs have to be done. Backwashing of the sand filter is carried out fully automatically if you use an automatic backwashing system, such as our BADUTRONIC.

4. *Crystal-clear water:*

Always remember: the filter system removes only the mechanical dirt and ensures good water throughflow. The pH value and chlorine content are just as important. So check this regularly as well.

5. *Avoid frost:*

Next winter will certainly come! So be sure, sooner rather than later, to empty everything which is not frost-resistant: filter, pump, solar collectors, pipes etc.

6. *Save energy:*

Heat your water, not the air. If you have opted for an auxiliary heating system for your swimming pool, then you should keep the heat produced in the pool itself. For this, there are covers for use at night and also for cool days. These covers are a sound investment and at the same time provide protection against dirt, dust, leaves etc.
